Installation Instructions for Software and USB Driver

Note: Install the software before plugging in the USB hardware

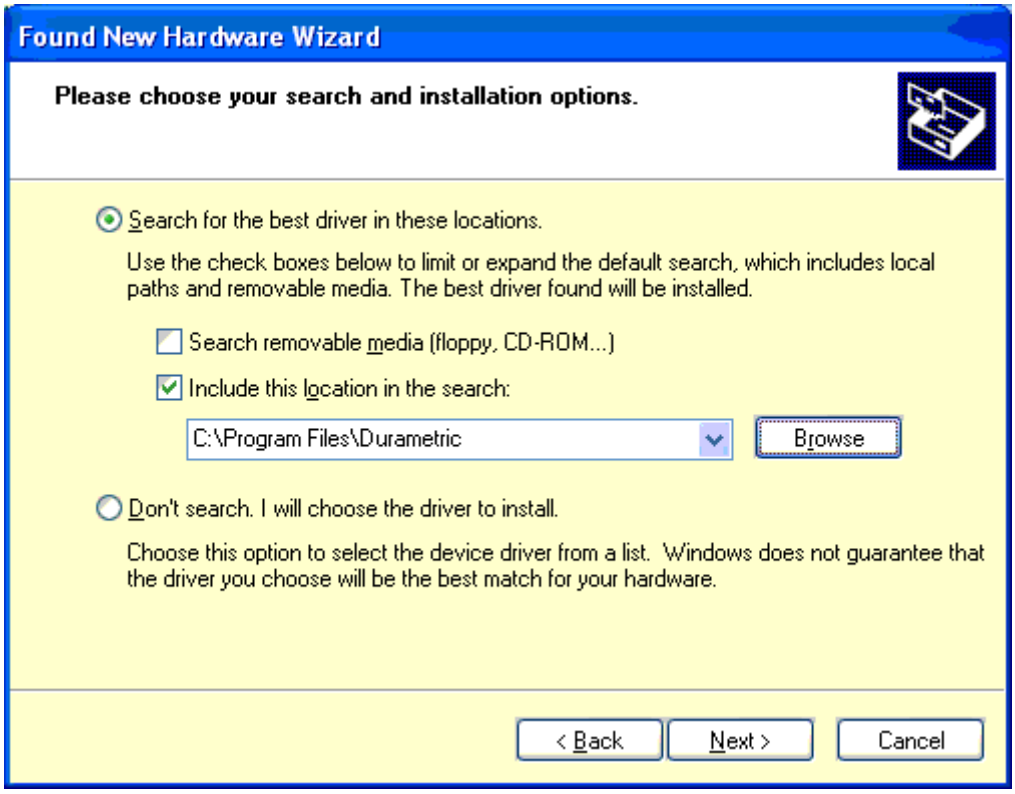

These instructions cover Windows XP Service Pack 2. Other versions of windows are similar but may vary slightly.

- Run the setup program and follow the instructions.
- If you do not have Microsoft .Net framework installed a copy is on the CD: “dotnetfx.exe”
- Once the software has been installed, plug in the Durametric diagnostic adapter
- If you are using Windows XP (SP2) you will see the following screen
- 

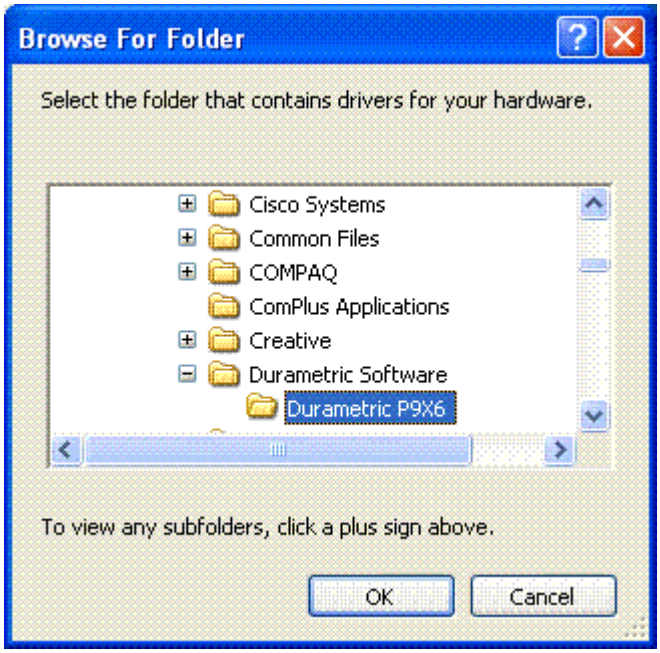

- Choose "Not at this time" then click "Next"

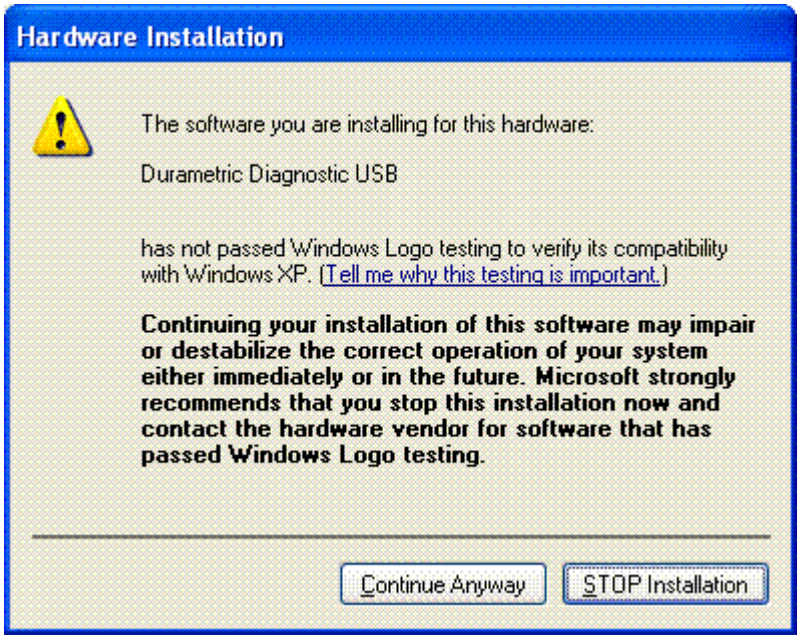

- Choose "Install from a list or a specific location" then click "Next"

- Select search for the best driver in these locations and check the box "Include this location in the search". Uncheck "Search removable media"
- Click Browse and select the install directory (usually "C:\Program Files\Durametric")

- Click "OK" then "Next", and you will see the files installing

- Choose "Continue Anyway"
- Click "Finish"
- Plug the diagnostic cable into the car
- **Make sure the Key is turned to the ON** position (the car does not need to be running)
- There should now be a green light on the adapter

- The program is now ready to use
